

S-BALL_STORYBOARD

Carlo is waiting the ferry boat at the stop in San Stae, has approximately 20 minutes of waiting time.

Watching advertising around, gains knowledge of S-ball, a service for people which have a little free time.

Connecting to the internet he downloads the application.

He starts the application...

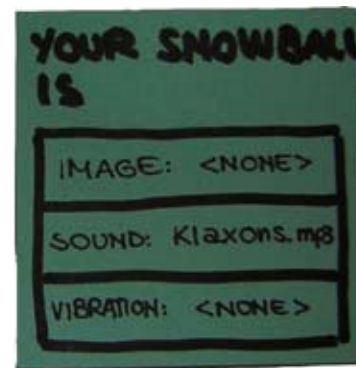

... quickly edit his profile, with his favourite passions...

... and decides the content of the snowball;

He can choose from three different type of content: image, sound, and vibration. they can be alone or together.

He accepts the profile...

S-BALL STORYBOARD

...And after first setting he's read to use the service, so he wait for nearby users to contact...

...Naturally after activating the Bluetooth!

Kate is at university and she's browsing the internet before going to the Italian course, she has 25 mins. of waiting time.

Then she find a banner of S-ball and because she often gets bored to wait...

... she downloads it on her mobile phone.

She starts the service...

...and edit her profile...

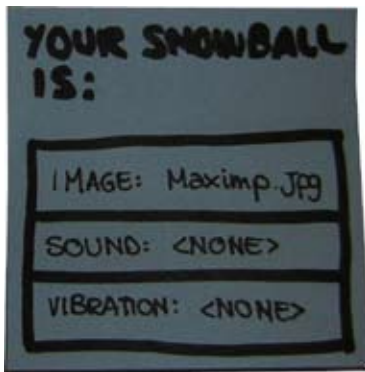

As Carlo did, she sets her snowball contents.

S-BALL_STORYBOARD

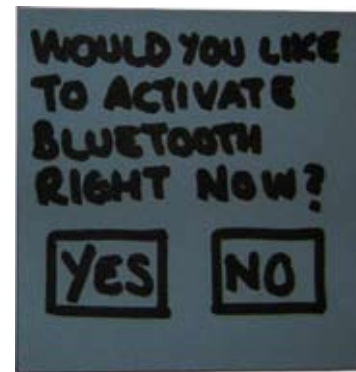

After deciding the setting there is a resume screen...

...and then there's a request of confirmation.

Also she forgot to set on the Bluetooth, so the program automatically asks her to activate it.

Kate walks to the class to attend the course.

She meets in her way the San Stae ferry boat stop.

Carlo's mobile sends a sound to inform of other users detection...

...and automatically the application send the snowball message he set by default.

So a little picture like "sending snowball" appears.

S-BALL_STORYBOARD

Also kate gets a sound of information, because Carlo has been detected in the range of 30 metres.

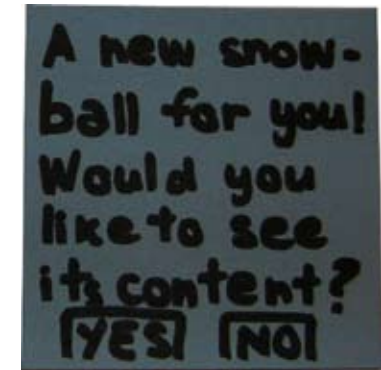

And after this she gets the snowball thrown by Carlo..

... SPLOATCH! That's it.

A message of information then appears.

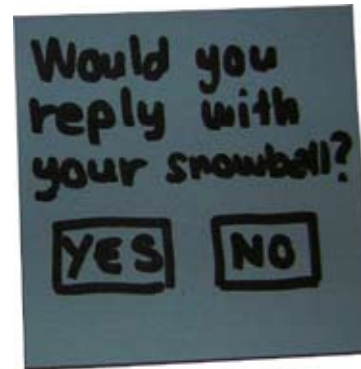

After accepting, the content of the snowball is revealed.

And Kate's first impression is good!

Every action correspond to a reaction, so she throws back another snowball to the sender! The fight is started.

So the default snowball of ate is sent to Carlo. Hey! What's this?

S-BALL_STORYBOARD

That's it, SPLOATCH (again)

He opens it and see a picture of a recent concert of Maximo Park

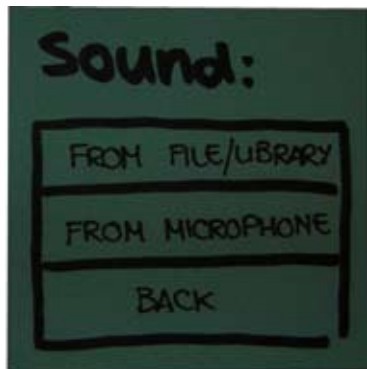

Then he replies to the snowball with a new one.

He selects the content type.

He selected the sound, and then has the option to select it from the library or recording it from the microphone.

He decides the last one and shout to the mic "Rock'n'Roll"!

Also wants to attach an image and selects the option of photocamera capture.

So he takes the picture.

S-BALL_STORYBOARD

So that's thrown

Instantainly kate recieves the message and opens it.

She listens to the message

Another reply request for Kate

She has to select the contents again...

...Se chooses for an image...

...and chatches it from the library.

Then she has to select the sound.

S-BALL_STORYBOARD

As sound she takes a song from the library (which can be reached by connecting to the internet).

After composing the snowball she sends it.

As predicted, the typical sound comes from the mobile of Carlo.

he sees the image and listens to the content.

The impression is good, he thinks that maybe it would be good to check the profile

In the meanwhile, Kate is approaching closer to the San Stae stop, putting at a distance of few meters from Carlo.

that's why her mobile makes a little vibration.

The same happens for Carlo's mobile. They sense their respective closeness.

S-BALL_STORYBOARD

As the things are going on, Calro decides to check kate's profile and remains enthusiastic reading her passions.

Also Kate's checks Carlo's profile and she gets interested to him.

Carlo quickly looks around to see if he can catch the girl while she's in the nearing. Finally he finds her.

Carlo and Kate have a little conversation for a few minutes, just the spend the rest of the fre time.

Finally they have to say goodbye eah other, but the encounter has been positive.

In fact Carlo has added Kate to his friends list...

...And the same did Kate!

Carlo is satisfied and in future will spend free time with S-ball!
